

Amy Boileau, Ph.D., RD.
Vice President, R&D, ChromaDex

Dr. Amy Boileau is the Vice President of Research and Development at ChromaDex, Inc. With more than 15 years of food industry and healthcare experience, her primary areas of expertise include infant formula and medical foods regulatory affairs, low-calorie sweeteners, and nutritional biochemistry.

In her role at ChromaDex, Dr. Boileau will be providing scientific leadership to accelerate market advancement of the company's products in the US and Internationally through the creation, facilitation and communication of scientific information and studies, education and the development and engagement of key opinion leader relationships. Dr. Boileau will also support the development of regulatory dossiers as well as coordinate preclinical and clinical research.

Prior to joining ChromaDex, Dr. Boileau worked for Abbott Nutrition as Associate Director of Regulatory Affairs, where she designed and led scientific programs and regulatory strategies for innovative new product launches. Dr. Boileau has also served as Associate Director for Cargill where she was responsible for global regulatory and scientific affairs for Truvia® natural sweetener. In this role, Dr. Boileau led a cross-functional team to achieve global regulatory approvals for steviol glycosides and also served as Truvia® brand media spokesperson.
