

# Global Leaders in Scientific & Regulatory Support

The regulatory environment for dietary supplement and food products varies around the world and continues to evolve in many countries. Divergent regulatory options need to be carefully considered and chosen based on the complex and extensive requirements for alternate approaches. Whether you are working with a dietary supplement, food ingredient, or finished product, Spherix Consulting can assist you in navigating the regulatory environment successfully and expediently.

## Our Global Food & Dietary Supplement Services Include:
